

DMG presents

IconVention Online

The Online Event on Resin Infiltration!

The DMG Online Academy is presenting a real highlight:

Starting this September, the 4th IconVention Online will offer a series of online seminars covering various aspects of vestibular infiltration treatment. Several prominent, internationally recognized infiltration experts have been engaged as speakers.

Participation is free of charge.

In Focus: MIH and other enamel opacities

The thematic focus of the 4th IconVention Online is developmental enamel opacities, and in particular MIH.

MIH is becoming an increasing problem throughout the world. It often causes children and young people a great deal of distress. IconVention is dedicated to the topic of MIH and other enamel defects, and provides insights into gentle treatment options. The topic will be examined in depth, both scientifically and clinically.

Innovative diagnostic options

How can transillumination be used as a valuable aid in the diagnosis of opacities in the anterior teeth? In which ways does this method help in the treatment with infiltration therapy? That is yet another topic of IconVention Online.

We're looking forward to an enthusiastic turnout at this extraordinary online-seminar event!

All webinars will start at **6 PM CEST/CET**.

Presentations will be in **English** and will last about **90 minutes**.

More dates will be added in 2025, so stay tuned – we hope you'll join us!

Our program for you in 2024:

11.09.2024

Prof. David Manton

MIH Introduction (terminology, prevalence, aetiology, scientific evidence)

18.09.2024

Prof. Katrin Bekes

Treatment options based on EAPD criterias and Würzburg concept for anterior teeth & OHRQoL

09.10.2024

Dr Omar Marouane

Classification of lesions & transillumination as diagnostic tool

23.10.2024

Dr Susanne Effenberger

Classification Developmental Defects „Myths & Facts“

04.12.2024

Dr Shiraz Khan

Success stories from the practice: how to implement Icon into the daily practice
